

Warning: Turn off the power before installation.

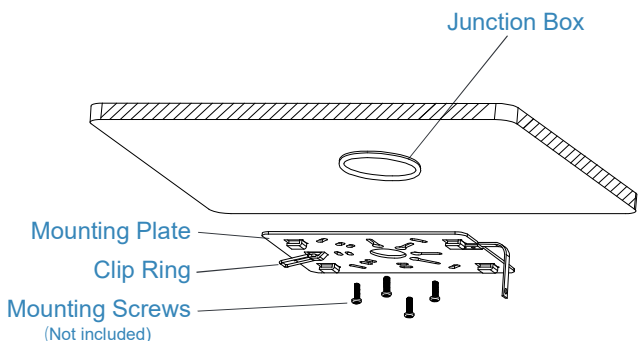

Ceiling Installation

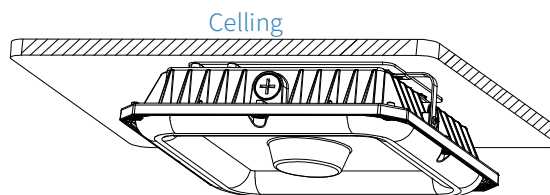

1. Unscrew the bracket screws and remove the mounting plate from the lamp housing.

3. Insert the clip ring of the plate into the latch of the light fixture housing, and hang the fixture on the bracket.
4. Disconnect the power supply and properly connect the fixture's wiring (live wire, neutral wire, and ground wire) to the corresponding power supply wiring.

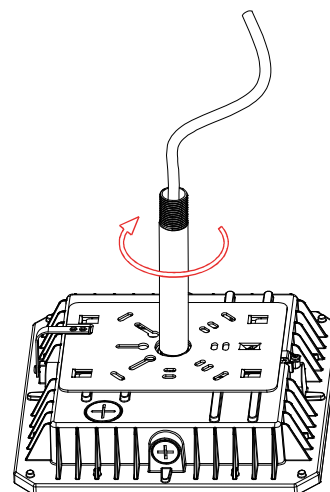

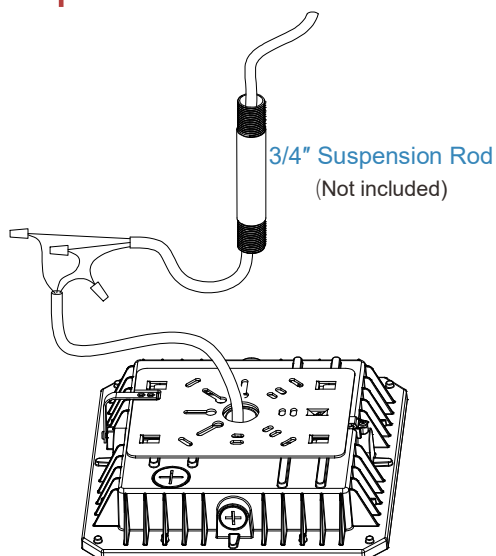

2. Secure the mounting plate to the ceiling using screws.

5. If there are color temperature and power adjustment functions, set them to the desired settings.
6. Push the fixture into the plate and tighten the screws to secure the fixture in place.

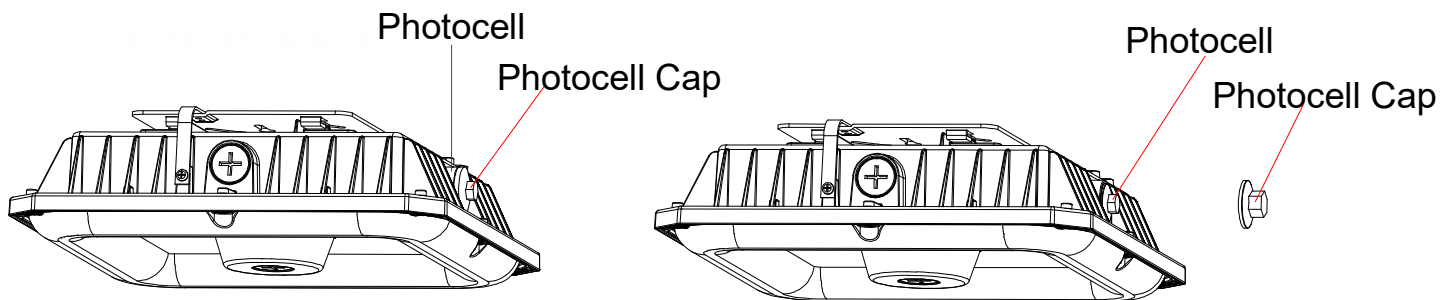

Suspension Rod Installation

1. Connect the lamp input line to the mains.

2. Twist the light fixture to the installation pole to secure it.

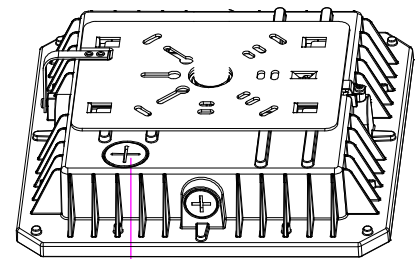

* If you need the photocell sensor function, please take of the photocell cap.
